

• CLOUD ARCHITECTURE • CARD GAME

Design AWS architectures. Card by card.

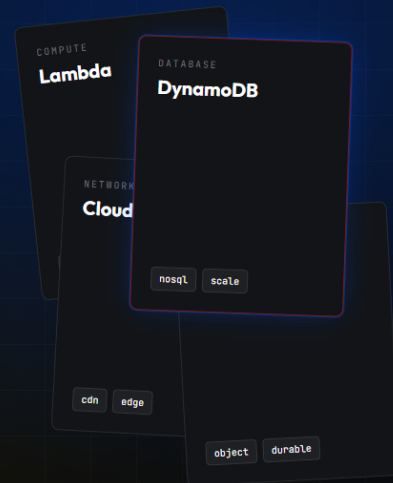

CloudForge Cards is an educational AWS card game. Read a scenario, pick the right services, justify your design, and get an explainable score back, instantly.

[Start solo run →](#)[Read the rules](#)

30 service cards

10 scenarios

8 constraints

/// WHAT'S IN THE BOX

Built for cloud certification learners.

No memorisation. Just hands-on reasoning about cost, security, scalability, and trade-offs, the way real architects think.

30+ AWS service cards

Each with category, cost, security & scale ratings.

Transparent scoring

Six explainable sub-scores, no black box.

Constraint chips

Low cost, secure, serverless, scalable, and more.

Hybrid AI judging

Rule engine + Claude commentary on every round.

Best-of-3 sessions

Three scenarios. Win the table.

Local leaderboard

Compete with your study group.

Ready to ship your first architecture?

A round takes about 3 minutes. Best-of-3 takes about 10. Your score and a written critique appear instantly.
